

PERFORMANCE CHEMICALS FOR SUPERIOR LEATHERS

UNPAC is the National Association that gathers the Italian leather chemicals manufacturers; it has become an integral part of the leather industrial chain establishing an ongoing relationship with the other components of the sector of reference at domestic and international level.

Founded in July 2009, it is an association formed by Italian enterprises strong and flexible in professionally meeting customer's requests and ready to safeguard the common interests of their area of expertise.

ITALIAN

To face the issues of the international markets, UNPAC intends to give a common voice to the Italian enterprises which manufacture tanning auxiliaries that, in a system able to activate strong internal synergies for an open comparison with the other components of the industrial sector, contributed to consolidate the role of leader, internationally recognized, of the Italian industry of the tanning sector.

LEATHER CHEMICALS

The excellence in the formulation of customized chemical products is the result of the exchange of competences and of the support to the Italian and international tanning companies during process' stages; an experience that warrants productive capabilities in line with the most modern needs of sustainability and circularity. The proven experience in the daily activity of supporting the tanneries, aimed at overcoming customer's applicative issues, let our enterprises develop an excellent network of applicative labs, essential supports to warrant productions in keeping with high quality protocols internationally recognized.

MANUFACTURERS

Over 50 years of industrial history have strengthened the specialization of the Italian enterprises in realizing top formulates; the increasing demand of advanced articles, constant need in the manufacturing field, pushed our enterprises to a continuous commitment in investing in innovative technological solutions. UNPAC aims at amplifying the image of an industrial reality of excellence able to express unique innovation levels, while respecting the autonomy of single members.

ASSOCIATION

In a more and more competitive market, preserving history and patrimony of the industrial culture sharing the common needs of global promotion and productive flexibility becomes a priority; it is upon these bases that UNPAC intends to promote the Italian competences in the customized formulation of tanning-chemical auxiliaries towards the domestic and international tanning customers. The productive know-how and the support services offered ensure the highest quality standards.

ITALIAN KNOW-HOW WORLDWIDE EXPERIENCE

INNOVATION

The excellence in the formulation of dedicated chemical products is the result of the exchange of skills and support in the phases of the process with Italian and international tanning companies.

QUALITY

The production know-how and the support services offered guarantee the highest quality standards because they are the result of a close collaboration between supplier, producer and consumer.

TECHNOLOGY

The growing demand for cutting-edge items has pushed our companies to a continuous and constant commitment to investing in highly technological and innovative solutions.

R & D

Our proven experience has allowed us to develop an excellent network of application laboratories, essential supports to guarantee production according to high quality protocols.

SUSTAINABILITY

We promote Italian skills in the personalized formulation of chemical-tanning auxiliaries, with particular attention to the issues of corporate sustainability.

PROSSIMAPELLE

CHEMISTRY > TRENDS > TECHNOLOGY > SUSTAINABILITY

Santa Croce sull'Arno June 2022 - A.W. 2023.24

Arzignano November 2022 - S.S. 2024

PROSSIMAPELLE is a moment of substantial confrontation between technicians and tanners for the verification of fashion trends and technological innovations, a real PHYSICAL and MULTIMEDICAL appointment, interpreting the artistic soul of leather, to enhance the know-how, becoming a material and visionary event, projected into the digital.

MATERIAL

because visitors can evaluate the skins and technologies on display, physically participating in the events in Santa Croce sull'Arno and Arzignano.

VISIONARY

because the new dimension of the event is also developed in the DIGITAL, with movies made by filming the skins on display and told, projecting the message of the exhibitors outside the physical boundaries of the event.

DIGITAL

the divulgation takes place through OUR SOCIALS, with a video showing the leathers developed by each exhibitor on the new trends, as a strategic objective is the push towards the subsequent digital participation of the visitor to the event.

EVERYDAY EVERYWHERE

Web gateway updated just-in-time 365 days a year, allows the visitor to consult the most important and complete database of italian suppliers for tanneries.

Consulting and analyzing the contents of the gateway allows you to stay constantly up-to-date on the latest technologies, in order to produce high added value leathers.
